PROFILE

Software engineer (ENSEEIHT, Master's-level engineering degree), full stack developer with strong DevOps practice. Across three internships, including six months on a production occupational-health SaaS at Padoa, I built web applications with **Java/Spring Boot**, **Node.js** and **Angular**, from requirements to deployment.

EDUCATION

Toulouse INP - ENSEEIHT, Master's-level engineering degree in Computer Science and Telecommunications 09/2023 – 09/2026 | Toulouse, France

Lycée Mohammed VI d'Excellence Benguérir, Preparatory classes MPSI-MP* 09/2021 – 06/2023 | Benguérir, Morocco

PROFESSIONAL EXPERIENCE

Final-year internship – Full Stack / DevOps Developer, Padoa 03/2026 – 09/2026 | Paris, France
Tech stack: Node.js 22 · Angular 20 · TypeScript · PostgreSQL · GitHub Actions · Docker · Kubernetes

- **Legal forms**: stored as free text, I migrated them to the reference-list system (**355,000 rows**, no data loss).
- **Quote templates**: I built the interface to **search, download, delete and test** the Word templates.
- **E2E tests**: I migrated the Cypress suite to Playwright across three business areas to **improve performance**.
- **Bug fixing**: fixed production bugs with the product and QA teams, and took part in code reviews.

Internship – Full Stack Java Developer, Banque Centrale Populaire 06/2025 – 09/2025 | Oujda, Morocco
Tech stack: Java 17 · Spring Boot · Angular · MySQL · JUnit · Docker

- **Need**: hundreds of cheques filled in by hand every month, with errors.
- **Solution**: I built an application that fills in, prints, scans and archives the cheques.
- **Result**: **three times faster** processing, and any cheque found in seconds.

Internship – Front-End Developer, SQLI 07/2024 – 09/2024 | Oujda, Morocco
Tech stack: Angular 16 · TypeScript

- Application form and applicant list for the HR team, supervised by a senior developer.

SKILLS

Back end
Java, Spring Boot, Node.js/Express, REST APIs, Hibernate/JPA, Maven

Front end
Angular, TypeScript, RxJS, React, Next.js, HTML, CSS

Databases
SQL, PostgreSQL, MySQL, MongoDB

DevOps & cloud
Docker, Kubernetes, GitHub Actions, Jenkins, Terraform, Ansible, AWS, GCP

Quality
Unit tests (JUnit), E2E tests (Playwright), code reviews

Methods
Agile/Scrum, Git, microservices, technical documentation

PROJECTS

E-commerce platform — Java 17, Spring Boot, Spring Security, Angular 14, MySQL, Docker
Catalogue, cart, orders, JWT authentication with roles, admin area, integration tests.

Pokémon REST API — Node.js 18, Express, Sequelize, MariaDB, JWT
Secure CRUD API: JWT authentication, data validation, consistent error handling and HTTP status codes.

Apache Spark cluster on GCP — Java 11, Terraform, Ansible, Linux
Five-machine cluster deployed with no manual step; Java WordCount benchmark from 28 s to 19 s.

Serverless: containers vs MicroVMs (team project) — Kubernetes, OpenWhisk, Kata Containers, Grafana
Measured the energy cost of MicroVM isolation: almost identical when warm, 1.4 to 1.75 times higher on cold starts.

LANGUAGES

French: native | **English**: C1, fluent | **German**: A2
