PROFILE

Software engineer (ENSEEIHT, Master's level) and full stack developer, available from November 2026. Across three experiences, I have built and evolved web applications with Angular, Node.js/TypeScript and Java/Spring Boot, all the way to production: REST APIs, automated tests, CI/CD, Docker and Kubernetes. I also automate infrastructure with Terraform and Ansible.

EDUCATION

Toulouse INP - ENSEEIHT, Engineering degree in computer science and telecom — 09/2023 – 09/2026 | Toulouse, France

Lycée Mohammed VI d'Excellence Benguérir, Preparatory classes MPSI-MP* — 09/2021 – 06/2023 | Benguérir, Morocco

PROFESSIONAL EXPERIENCE

Full Stack / DevOps Engineer, final-year internship, Padoa — 03/2026 – 09/2026 | Paris, France

- **New features** on an occupational health SaaS platform in production (Angular/RxJS, TypeScript, Node.js/Express, PostgreSQL), including an interface to manage Word quote templates, in an Agile/Scrum team.
- **Migration of legal forms to the reference-list system**: data model changes, back-end and front-end updates, and data migration with SQL scripts.
- **Automated E2E tests with Playwright** on business workflows: test data, fixtures, Page Objects, assertions.
- **CI/CD** with GitHub Actions, Docker and Kubernetes deployment (Helm, Argo CD); code reviews and production bug fixing (Prometheus/Grafana).

Full Stack Developer Intern, Banque Centrale Populaire — 06/2025 – 09/2025 | Oujda, Morocco

- **Built a cheque management application** (**Java/Spring Boot**, **Angular**) for the bank's accounting team: creating, searching, tracking, scanning and calibrated printing.
- **REST API** between front end and back end, MySQL persistence with JPA/Hibernate.
- **Continuous integration** (tests, Maven build, Docker image) and server deployment (Tomcat/Nginx).

Front-End Developer Intern, SQLI — 07/2024 – 09/2024 | Oujda, Morocco

- **Angular/TypeScript** web interfaces for an internal HR application: forms, dynamic views, REST API integration.
- Took part in testing, bug fixing and feature changes within the project team.

SKILLS

Front end
Angular, TypeScript, RxJS, JavaScript, HTML, CSS

Back end
Java, Spring Boot, Spring Security, JPA/Hibernate, Node.js/Express, REST APIs, JWT

DevOps & cloud
Docker, Kubernetes, Helm, Argo CD, Terraform, Ansible, GCP

CI/CD & quality
Git, GitHub Actions, GitLab, Jenkins, Maven, Playwright (E2E tests)

Data & monitoring
PostgreSQL, MySQL, SQL, Prometheus, Grafana

Methods
Agile/Scrum, Test-Driven Development (TDD), Clean Code, Design Patterns, code reviews

PROJECTS

E-commerce platform — Spring Boot, Spring Security, Angular, MySQL, Docker
Full application: catalog, cart, orders, JWT auth and roles, admin area, server-side pricing, integration tests.

Pokémon REST API — Node.js, Express, Sequelize, MariaDB
CRUD API with JWT authentication, bcrypt-hashed passwords, data validation and search by name.
